VOLUME 17

CHAMPION, (Alberta) THURSDAY, August 29, 1935

NUMBER 18

Jock's Waggin' Tongue

Vol. 1 Thursday, August 29, 1935 No. 10

Published in the interest of the residents of Champion and District.

The new Stewart-Warner Jubilee Electric Radio has arrived. Quality with tone at a fair price.

Scandy—Let's burn up the road.

Bill—Let's wait until we are coming back.

Phone No. 6 for your Radio batteries.

Heavy gauge 45 gallon Hot Bottom Water Barrels with or without lids, at a special price.

All roads leading to success are under construction.

Amputation is down in price. Our new stock has arrived at the new reduced prices.

Take advantage of the Coleman Lamp deal, a P. H. Helms reports put \$2.00 credit for any olding his Me-Drig. Comp on the new Coleman line in the field for the Oil or Gasoline Lamp—ninth season for \$92.50.

Vic Morgan is a business visitor in the district.

If you require any handle forks, we are disposing of stock on hand at a bargain price.

Used set wood shaft golf clubs. Owner has notified us he has quit the royal and ancient game. Set is short No. 5 iron. Phone 6 or see Dr. Wilson.

The Florentine green glass vase is on display.

The bridge struts are very attractive and durable with or without reasonable in price.

Gen Smithson is a business visitor in the district at present.

Bring in your small belts and have us lace them with the English made Tigro wire laces.

O. E. Sommers reports 23 bushels per acre.

ELECTED

Rev. Peter Dawson
Social Credit member for Little Bow Constituency, and first member to be elected.

Word of Appreciation

I would like to express my sincere appreciation to all those who supported me in the election, and for the good work done by the campaign committee in carrying it so successfully.

I thank you,
Peter Dawson.

"An Englishman Always Pays His Bet"

There was a little fun on the street on Saturday afternoon, around one thirty, when Horace Gill, as the result of a bet with Mrs. D. Chamberlin on the election returns, wheeled her in a wheelbarrow up and down the main street. Mrs. Chamberlin carried a placard on which was written "An Englishman always pays his Bet." Social Credit booster takes a Ride! Several sniffs of the incident were taken.

Grain of Good Quality

The grain that has been coming in so far is of excellent quality and weighing over 60 lbs. to the bushel. One sample brought in by Frank Recher weighed 67 lbs. to the bushel, this was tested on three different scales. A number of farmers have not yet started in to cut in order to allow the pig weeds to get ripe to make it easier when handling it with the combine.

Card of Thanks

We wish to extend our sincere thanks to the doctors, nurses and many friends for kindness shown while in the hospital, also for the gifts and beautiful flowers.

Ruth and Gladys Anderson.

Lower Grain Storage Rates

Something new in the history of the grain business in Western Canada developed this week when the Alberta Pool Elevators announced the latest cut of cutting the storage rates for grain stored in its elevators by approximately one-third effective from Aug. 31, 1935 to August 31, 1936.

Pool elevators will charge 1-1/2¢ a bushel a day for grain in store instead of 1-1/2¢ a bushel a day—the rate which has prevailed for many years. The new rate will apply for grain stored in its over 45 country houses as well as in its 4 terminals at the Pacific coast.

Alberta Pool elevators is a co-operative organization owned and operated by Alberta farmers. In that position it considers it a privilege to be instrumental in reducing cost in some measure to the grain growers in a year when crops have suffered severely from drought, hail and frost.

MARRIAGE—BOWIE

A marriage of interest was solemnized in the United Church, Vulcan, at 7 o'clock Friday evening, August 29th, Rev. Peter Dawson officiating, when Margaret Georgina Bowie, youngest daughter of Mr. and Mrs. Peter Bowie of Vulcan, became the bride of Mr. Leslie Marshall, eldest son of Mr. and Mrs. Marshall of Champion. The bridal couple was attended by Mrs. David McFarlane, eldest sister of the bride, and Mr. Wm. Bowie, brother of the bride. Immediately afterwards and friends only witnessed the ceremony. The bride was charming in a gown of white silk, net over white silk satin. She wore a veil caught with orange blossoms, and carried a bouquet of yellow roses. The bridesmaid was dressed in a blue silk suit with white tuck and carried a bouquet of sweet peas. Immediately following the ceremony the couple left for Lethbridge on a short honeymoon visit. Mr. and Mrs. Marshall will reside on a farm near Champion.

Following the return of Mr. and Mrs. L. Marshall to the district they tendered their many friends with a wedding dance at the Reid Hill ball on Wednesday, August 29th. The Fraser brothers' orchestra of Carmanag provided the music. The affair was attended by many friends of both families.—Vulcan Advocate.

Lethbridge Experimental Letter

Selecting Seed Corn

The time has arrived when thought should be given to the selecting of seed corn for next season's crop, as frost damage is liable to occur early in September. The weather records of the Experimental Station for about 25 years past show that the average date of the first fall frost is September 10th, and the average date of the first killing frost, which is four degrees or more, is September 20th. This season the cold, wet weather of May was unfavorable for corn but good growth was produced in the hot dry weather of July and August so that many corn crops will be sufficiently well advanced to produce good seed early in September. Ears of flint varieties which have reached the glazing stage if picked now and properly stored will suitably seed, and ears of dent varieties which have the dents formed should also make suitable seed. In order to guard against frost damage, as much as possible it is generally advisable to select a few of the best ears as soon as they appear sufficiently mature, and if the weather continues favourable much more seed should be ready for picking a little later.

Proper storage is most essential in producing good seed corn. The ears should be husked almost immediately after picking and stored in such a way that they do not touch one another. But that the air gets a chance to circulate between them and carry off the moisture.

Where seed is produced in any considerable quantity a good method to adopt is to stretch chicken wire lightly over a frame work of 2x4's or 2x6's so that the ears will be placed in holes and allowed to hang until dry. Where only a small quantity of seed is produced it is often quite satisfactory to strip the husks back and tie them together, putting about a dozen ears into a bunch and hanging them in a suitable place to dry. The corn should be left on the ear until the early spring so that it has the opportunity to become thoroughly dried. When stored as mentioned the germination should be high but it is almost advisable to test seed corn for germination before planting. Almost every season instances are mentioned to us at the station of where corn has been sold as seed and failed to give a satisfactory germination. No doubt in practically all cases in proper storage and accounted for this condition. Selection of seed corn at this time of the year will therefore give greater assurance of a satisfactory crop next year and will also tend to improve the strain of corn used on account of its being more acclimatized.

Consider The Cow

If your advt. were in this space as many people would read it as are reading this. But your advt. isn't here, and people do not worry whether you are selling real estate, gasoline, peanuts or popcorn.

Did you ever sit down in the pasture with a pail between your knees and wait for a cow to back a up and be milked?

Of course not. You know better than that.

Well, business is somewhat like a cow. You have got to go after it and round it up. The fellow with the milk pail between his knees may get some milk, but the odds are all in favor of the fellow who drives up the cow and feeds her.

Some kind of advertising must be done if a business is to amount to anything. Either walking and talking or writing or printing. But the least costly, most profitable and dignified way is by the regular newspaper—people pay for it. They value it and have faith in the advertisements.

The Most Delicious Tea

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college, ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of denied and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprising development, in fact more so. The world will not stand still, neither it will move backward. Since the beginning of time and the dawn of civilization the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips of practically everybody today—Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hires' Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of today? They do.

It was in 1890 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$45 a month he took his shop along, and in 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was rated a billionaire.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut it into crude solid tires and sold them to buggy wheels. Thus began the great tire industry of today.

H. J. Heinz used to grow horse-radish in his garden and peddle it to the youth of today. This backyard venture put him on the road to becoming Heinz 57.

In 1886 a doctor in Atlanta stood working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rushed over, acquired some ingredients, mixed, ladled, and sweetened, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hires was served a drink by a farmer's wife. The ingredients were sausage, larders, and sweet fern, all gathered locally. Hires smacked his lips. Returning home he experimented with herbs, roots and barks. Thus was Hires' Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bill of goods from a wheelbarrow. Adams Gimbel, founder of the stores which bear his name, started with a pack on his back. Timonxy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten cent stores is too well known to call for repetition. The great Crane Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of today had very humble beginnings, many of them within the life of the present generation. Opponents are just as great to-day. "What's going to alter our lives is probably happening this minute in a backyard workshop, where some crank is thinking by way," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea. They are beginning in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in the United States selling many different products told about four new products, all launched since January, 1930, and now selling widely. David was not afraid of failure, and observant youth with an idea or capable of assimilating one, with vision, enterprise and daring can just as successfully win out against the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in *Forbes Magazine* says: "From much of the above is taken, say: 'Ten years from now we will be reading more success stories gathered from the kitchens and cellars of 1935.' No one who has a work-bench or a stove and a dollar—and an idea—has any, need be discouraged."

Strange Service

700 Dead Mistle Thrushes In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 dead and dumb persons from 14 nations pray and sing without a sound being heard. They were job-seekers attending the fourth international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and missionaries mounted the lofty pulpit and vociferously acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar

Lord Londonderry, British Secretary of Air, has just celebrated his 67th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes. It stands on his estate at Mount Stewart, Newmarket, Northern Ireland, where there is already an airport with a landing field of 50 acres.

British laundries have an annual revenue of approximately \$10,000,000 from handkerchiefs alone.

Would Solve Problem

A Few Dozen Eggs From England Made An Experiment

Shipment of English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane, and a railway journey of 500 miles from Brisbane to Sydney. The first reached Rio Grande do Sul, Brazil, after travelling more than 6,000 miles from London by airplane and Greg Zeppelin. Now Lord Londonderry is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. If the eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

The deep-sea fish, Chlamidodon Niger, famous for its voracity, sometimes manages to swallow a fish larger than itself.

More common coddies are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going. 2113

For So-Called Luxuries

Bureau Of Statistics Has Issued Some Interesting Figures

What are luxuries? The Dominion Bureau of Statistics started to compile figures on the luxuries produced and consumed in Canada in a year, and was confronted with the difficulty that one man's luxury is another man's ordinary, every-day comfort. This is true of food, furniture, clothing and so on. Even tobacco is claimed by some to be a necessity. So the bureau finally decided to list everything as a luxury which is actually above the line of necessities. It included, therefore, such things as carpets, silverware, jams and cooked meats and so, naturally, it did not present its conclusions as a hard-and-fast statement of luxury consumption in Canada, but rather an attempt to throw some light on the production and consumption in Canada of goods which are more or less in the nature of luxuries. It found that the factory value of these in 1933 was \$263,688,185, or 12.6 per cent. of the total value of production in Canada manufacturing industries. The retail values would, of course, be much higher.

The bureau also obtained Canadian consumption figures by surveying exports from the figures for imports and production. It found that in 1933 the so-called luxuries were consumed to a factory value of \$268,342,910.

Some of the individual items are rather interesting. Canada eats 1933 to the factory value of nearly \$17,300,000 a year; ice cream to the extent of more than \$3,700,000; other confectionery, including chewing gum, over \$6,000,000. Pies, cakes and pastry account for more than \$10,000,000; beverages (not including tea, coffee, cocoa, etc.), nearly \$21,000,000; silk history (which the bureau says is not often considered a luxury nowadays), nearly \$8,400,000; and preparations for hair, \$2,000,000. These are all factory values.

The surprising item in the list is that for tobacco, as follows:

Cigars	\$ 6,016,138	\$ 4,765,393
Cigarettes	36,132,977	34,912,141
Other	32,842,202	31,596,679

\$74,991,347 \$1,774,213

These again are factory values. For passenger automobiles, bicycles and boats, Adams Gimbel, founder of the stores which bear his name, paid the manufacturers less than half what they did for tobacco in both these years: \$25,254,984 in 1932, and \$24,518,690 in 1933. —Toronto Daily Star.

Favors Stiff Sentences

Severity For Prisoners Demanded By German Minister Of Justice

"Severity" for prisoners as a Nazi word was demanded by Franz Baezel, minister of justice, at the opening of the 11th quinquennial penal penitentiary congress in Berlin.

"If criminal law is to represent a statement for wrong done the community," he told the 400 delegates from 50 nations, "hence defend and protect the national community from evil-doers, the logical result is severity in the treatment of prisoners as the punishment may be applicable to the evil."

Guertner also announced that the Nazi Reich has definitely rejected the ancient legal principle, "Nulla poena sine lege" (no punishment unless a law is infringed). Instead, he said, it has substituted the maxim: "Nulla poena sine poena" (no punishment unless the punishment is meted out regardless of the incompleteness of a law).

Combination Boy Divers

Crude American Boy Dives Articles Enables Boys To Submerge

The Main reason travelling more than 6,000 miles from London by airplane and Greg Zeppelin. Now Lord Londonderry is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. If the eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

So the boys, Paul R. Dyer, Stanley Griffin and Robert Cate, constructed diving apparatus from a five-gallon gasoline can, two automobile tire pumps, a small corrugated can and some cement.

Successful in their first attempt, they plan to explore greater depths.

Anxious To Know

A very nice old lady had a few words to say to her granddaughter. "My dear," said the old lady, "what you would do something for me. I wish you would promise me never to lose two words. One is well and the other is lady. Would you promise me that?"

"Why sure, Granny," said the girl. "What are the words?"

Leprosy reached the United States from both Europe and Africa.

The oldest trout known to mankind is the olive.

Celebrating Anniversary

Violin Industry Started In German Town 230 Years Ago

Mittenwald, Germany, a village in the mountains of Bavaria is now celebrating the 250th anniversary of its violin industry, begun in the 17th century by Matthias Klotz.

Throughout the summer the town folk presented a play, "The Song of the Stars," telling the story of Klotz and his wanderings over Italy, where he learned instrument making. The play will be staged again this winter at a nearby town as part of the entertainment for the winter Olympic story of Matthias Klotz is a romantic one. When he was a boy of 10 his peasant family sent him to Italy to study under famous violin makers there. Twenty years later he returned to Mittenwald, opening his own workshop. Apprentices flocked to him and soon he established the fame of the town for fine instruments, a reputation Mittenwald retains to-day.

After making a number of instruments, Klotz's craftsmen had to go out into the world themselves to sell them. Strapping their violins on their backs they wandered through nearby countries, giving demonstrations and making sales in castles and great monasteries.

Correspondence Courses

Extending Education To Those Out Of Reach Of Schools

Nine years ago the Ontario Department of Education started correspondence courses for persons out of reach of school either for the whole school year or part of the summer months. The courses were intended also for those physically unable to attend school and for whom no provision was made for education.

During the last school year the enrolment was 1,500 of whom 50 were physically unable to attend school. The courses are free and the department pays all expenses. Average cost of educating a pupil for a year in this manner is from \$12 to \$15.

FASHION FANCIES

THE LATEST FASHION TRENDS IN THE IRISH FREE STATE HAVE GIVEN KING GEORGE VI A DECISION TO BE NOT ONLY NATIONALLY APPROPRIATE BUT MOST ACCEPTABLE TO HIS MAJESTY.

It is a beautiful antique silver potato ring. These rings, which measure up to a foot in diameter, were put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets. The rings were then rolled about. Reminiscence of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold at auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

Gift Was Acceptable

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyalists in the Irish Free State have given King George VI is declared to be not only nationally appropriate but most acceptable to His Majesty.

It is a beautiful antique silver potato ring. These rings, which measure up to a foot in diameter, were put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets. The rings were then rolled about. Reminiscence of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold at auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

Scrambled Eggs

Motor Accident Scatters Truckload Of Eggs Over Highway

Nelson Snyder, of Harrison, Ind., knows what 100,000 scrambled eggs look like.

While driving a truck over Pocono Mountain near Mt. Carmel, Pa., Snyder was forced to turn the machine sharply to avoid hitting a train. His cargo of 100,000 eggs was scattered over the highway for some distance. Practically all of the eggs were broken.

Are Carefully Trained

Pigeons are trained as carefully as a horse and usually when a pigeon becomes lost it is because it was in poor condition to start the race. The owners start training their birds at the age of two months. The pigeon reaches the peak of his racing between the ages of two and four years.

Rainbows are not semi-circles, but complete circles. If we were high enough in the air, we could see the entire circle.

It has been estimated that approximately 15 pounds of fat is required to burn one pound of coal.

Marking The Ballot

Strange As It May Seem, Many Voters Mark The Job

"Facing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will mull the job."

In the 1930 count 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have yet to make the crosses themselves. Only in 1930 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens and deputy returning officers throw out their ballots. On accounts, however, judges frequently have ruled such ballots valid. The election Act says the cross must be made with a black pencil.

Many persons start to mark X's opposite the wrong name, score it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new one.

Voters sometimes ask why all this fuss about little markings when the voter's choice is plainly indicated. The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '90s and earlier when the population was small, party workers knew which voters were Conservative, Liberal and those in the fence." Of the undecided variety some would sell their votes and the temptation of workers in a close race was strong.

But unless the voter buyer could be sure those he bought went to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result was that the regulations to prevent distinguishing marks.

Election workers claim there is very little direct bribery now. Bids are so populous and party affiliations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew around the world in eight days, 15 hours, and 15 minutes, in 1931.

Post made a solo record of the world flight, in seven days, 18 hours, and 49 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged suit" of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the atmosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mae."

Odd Trick Of Nature

Salter Relates Story Of Three-Year-Old Bath In 35 Fathoms

Nelson Laish was in the crew of the scalloper, Virginia, three years ago when she was rammed and sunk off Georges Bank. With his clothes in a forecastle locker was a pocket handkerchief, his initial embroidered in a corner.

Now Laish has his handkerchief again, for he's in the crew of the Louis A. Thebaud, and in her scallop drag the crew found a handkerchief with Laish's initials in the corner, in almost perfect condition after a three-year bath in 35 fathoms!

Only One Luit

Ten years ago the late Will Rogers was in a plane which had left Los Angeles for Kansas City. The ship hit an air-pocket and dropped 20 feet. "It-blow her," asked a frightened passenger, "can one of these planes drop?"

"Well," Rogers informed, "the ground's the limit, boys."

Mammoth cave, Ky., has been equipped with 12 floodlights and 16 search projectors to illuminate its interior.

You can tell by his smile

Things are looking up... times have improved and he's again "rolling his own" with Ogden's Fine Cut. Why not "get back to Ogden's" yourself and again give yourself the pleasure Ogden's alone can give. Use the best papers, too... "Vogue" or "Chanticleer".

MINARD'S "KING OF PAIN"

MISS ALADDIN

—By—
 Christine Whiting Farmer
 Author of
 "One Wide River To Cross"
 "The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-bell, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he has, and his family is faced with the necessity of a simpler method of living. At this juncture a letter comes from an eccentric relative in Colorado, who offers the girl a home that what seems to be impossible condition.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack leave for Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. Mark Adams comes along the road, driven by Matthew Adams, and she asks him which way to go. They then climb the hill, look around, and then go on to Cousin Columbine's. There Mark Adams tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been tried to help out while Luke's leg gets better. With Jack away, Nancy takes care of her father, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and let her to collect others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbia residence all lit up, and asks Matthew if he knows why. He said: "Let's go in and see. Then Nancy learns that it is having her debut, but in a different setting than had been planned for her in Boston.

Now Go On With The Story

CHAPTER XIV.—Continued

"She was a courageous woman, my mother, but I have sometimes wondered what was in her heart as she set me on my feet and moved toward that door, unarmed. Did she expect to confront a band of roving savages? What met her eyes was a simple brave, and a band of possibly seven years old. No doubt the Indian looked sinister enough. Only the week before a woman not many miles away had been raped and mutilated. The horror of that story was still upon her; yet she did what may have been the only thing that protected her from the Indians. My mother smiled! It was, I imagine, a smile born out of terror; but to that grinning Indian it was a gesture of friendliness. Who knew but that there had been more such gestures, one page of our history would have been less tragic. And then, although her hands were so tightly clenched that (she found later) the nails had pierced her flesh, she looked straight up at him and said two words which sounded strange to her own ears in such a moment. Perhaps you have guessed them, for what my wonderful little mother said was: 'Merry Christmas!'"

Miss Columbine paused, and there was silence until Aurora Tubbs exclaimed: "But you say that it was that wild Indian knew what she said, Miss Columbine! It's not believable."

The old lady seemed to be looking at something far away.

"Not the words," she answered, "but perhaps he understood the."

When your daughter comes to womanhood. Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

smile; and she spoke gently. He came into the room, followed by his boy, and Aurora, arms folded, looking down at that small, gay tree and that happy little girl who knew no fear. For a moment I was too absorbed to notice the callers, then, glancing up suddenly, I laughed with pleasure. "Here was another child! I held my breath, so that I might hear what he could see. 'Look!' I cried joyously. 'My new baby! See!'"

"The girl reached out and took from me, his white teeth gleaming in a quick smile. The man grunted something unintelligible and moved nearer the tree. He seemed, my mother told me, both puzzled and admiring, like a big child wondering what it was all about. He touched a yellow butterfly made from a scrap of paper, and something more, letting his glance rove slowly about the room. Her heart quickened as his eyes rested on the rifle; then subsided when he made no move to touch it. The boy, still admiring my homestead, said something rapidly, and took from his pocket a string of beads, holding them out to me. It was, my mother understood, meant as an exchange for my clothier's bag and fastener. She should have rebelled, she said: "See darling, he has brought you a Christmas gift! Let him keep your dolly. I have another exactly like it for you; and this poor boy has no lovely tree, perhaps no mother. Tell him to keep it!"

"My lip trembled; that she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently she was testing to see if the beads were for the Indian, for I lifted the paper butterfly from its branch and held it out to him, saying: 'It's your dolly, just like it for you; and this poor boy has no lovely tree, perhaps no mother. Tell him to keep it!'"

"My lip trembled; that she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently she was testing to see if the beads were for the Indian, for I lifted the paper butterfly from its branch and held it out to him, saying: 'It's your dolly, just like it for you; and this poor boy has no lovely tree, perhaps no mother. Tell him to keep it!'"

A breath of pleasure swept through her audience as Cousin Columbine ceased speaking; then she continued to remember the Indian stopping to take my offering. I know he smiled, though that is something my mother would not have granted a word or two, intended, she was sure, as thanks; gave one more curious look at the small tree; and then he turned to the strange, strange Christmas guests, mounting their ponies and riding into the forest, disarmed, my father used to say, by the bewitching smile of the Indian.

"And did you ever see them again?" questioned Eve Adam, her low voice very gentle.

"I never again. What they came for—where they were going, we never knew. And only a half hour after they sounded close to that well-barred door, the clear, sweet note of a hermit thrush! Not until then did my valiant mother give way to tears."

Said Matthew Adams, gravely: "That is the nicest Christmas story I ever heard, Miss Columbine."

"And now," suggested his mother, good-bye to the melodeon, 'let's end our evening by singing some of the good old carols."

That night when the guests had departed and the Nelson mansion stood quiet in the moonlight, Nancy went to her tower and gazed out at that starry, starry sky. It was a long, exciting day, and suddenly conscious of being tired, the girl opened the window and slipped carefully into her big black walnut bed.

The moon was very bright and she quite clearly Aurora's candle and the military figure of General Grant, looking down upon her from the wall. She saw too, that her chiffon gown by where she had tossed it carelessly, in close proximity with the patchwork quilt, and Nancy smiled to herself, then in the moonlight.

"Chiffon and calico," she murmured drily. "I guess they aren't so far apart as I used to think." Then she turned to the steel engraving and she laughed a little.

"Good-night, General Grant," she said, and she was profoundly asleep at first, but I believe I'm getting to rather like you. Perhaps it's the uniform. They say that sooner or later a woman always falls for a uniform. I'm sorry you weren't downstairs this evening, General. It—it was a wonderful debut!"

CHAPTER XV.

It was at Christmas dinner that Nancy divulged her plan for the Aladdin Library, a proposition which met with instant enthusiasm. John Adam readily agreed to supply the money, and one day in January Mark brought it in from the ranch.

"Dad's been so temperamental you'd think he was winning a picture for the Art Museum," he declared. "Honestly, Nancy, since you wished this job on him that man's neglected his duty. He's been ashamed but the sign's a corker."

"I'll say it!" Nancy spoke at most with awe. "I never expected

anything so—so professional, and those Aladdin lamps at either end are so stunning. Your father, looking down at that small, gay tree and that happy little girl who knew no fear. Mark. Can you put it up if we go over to the schoolhouse now?"

"I can't promise," said there's a box of books at the station which our sweet young Denver cousin, and I've been to see. 'Marry' he says, to finish the shelves this afternoon, and—Hi there, Aurora Tubbs! Come see this sign."

Aurora emerged from the kitchen, and stood, arms akimbo, admiring eyes on John Adam's handwork. "If it don't look exactly like a boughten one, it's the silliest thing ever since Victor's cousin Ella had some written by a one-armed soldier who was paid 'em in a doorknob in Denver."

"But don't you see 'em for three months!" cried excitedly. "Hello, Miss Columbine. Just look at Father Adam's masterpiece!"

Cousin Columbine came briskly down the steps.

"It's a beauty, isn't it?" said Nancy, her eyes on the sign.

"It surely is. Are you going to put it up to-day, Mark?"

"Soon as I swipe a ladder out of your shining Yocher have to come along, Nancy, and boss the job."

Those days were full of interest, for Aunt Louise and the girls at school had been to see the sign. Nancy's plan for books. Mother and Dad had doubled the number; Phil had added to the list. Mark and Aunt Judy, immediately on hearing about the scheme, had sent a check for the purchase of new ones.

No check had ever looked so good to Nancy Nelson, or been so welcome; and one day Mark drove her to the Springs to purchase this important material.

He also improved the occasion considerably by taking her to lunch at the Aurora Casino room, and to a region, where it was dark when they reached Pine Ridge again, to find Aurora declaring that their mangled bodies were rubbish as to the broken pieces of a stone.

So it was, in fact, as Mark said later, she looked a trifle disappointed when they arrived safe and sound in the kitchen.

"Didn't I say you were demented, Aurora Tubbs?" observed Miss Columbine triumphantly.

Despite the tone, her face looked noticeably relieved; and Nancy exclaimed: "Oh, dear! we only went to a movie. I didn't dream that you'd be worried. Cousin Columbine."

"No more I should have," snapped the old lady. "I'm sure that happened on that night when the good-better call up your mother. No doubt she's wondering where you are."

"And me, my'reself sick for nothing," grumbled Aurora. "A movie! Not even a fat tire; and we wonder if your neck isn't broken."

That day seemed long ago to Nancy when on an afternoon in February she went down the unkempt street, toward the Pine Ridge, and ascended a low hill on which stood the abandoned schoolhouse, "recalling" her mother's words, and had told her, to replace the one destroyed by fire. It was a small, frame building with no pretense at beauty, but the girl paused for a moment to admire John Adam's handwork before she unlocked the door.

The air outside was warmer than within, and Nancy opened a window before proceeding with what Jack called "janitorial duties." The light stove was lit, and the whole place dated before the first arrival should appear. These tasks accomplished, she turned to the kitchen table which served as librarian's desk, and looked about with satisfaction.

Perhaps the girl didn't wholly realize that this satisfaction which was like nothing she had ever experienced before, was the result of having achieved something—something really worthwhile. She had had help of course; but the idea had been her own, and Nancy had put it through triumphantly.

"I couldn't have done it without the others," she told herself, "but I wish, they wouldn't have done it to me; and Cousin Columbine was doubtful that the plan would work."

Yet, being so well-blended, the old lady had done her bit by arranging for the use of the schoolhouse, and writing to the Oklahoma friends for the same for Pine Ridge students. This proved an inspiration, for they responded with a box of books and a quantity of Navajo rug in grey, blue, and scarlet which covered the centre of the floor, giving the place a homey look.

"And some day," mused Nancy, as if her stay in Pine Ridge was to be indefinite, "we'll put it in a fireplace. That's all we need to make it wonderful."

(To Be Continued)

New Method Of Rust-Proofing Shows No Rust After 1,000 Hours Of Salt Spraying

An entirely new method of rust-proofing, which, for the first time, has the history of electro-chemistry, utilizes alternating current in the process, has been perfected by the Ford Motor Co. and is now being used on its entire production of head and tail lamps, at the Ford lamp plant at Flat Rock, Mich.—the famous "factory in a meadow."

The new process was adopted because it requires less floor space than other rustproofing methods, provides a surface all ready for painting as the article comes from the rustproofing machine, and without need for drying.

The work was described in a letter from the expedition headed by the noted Alaskan archaeologist, Dr. Otto Gerd.

Aided by 30 or 40 Eskimo laborers from Barrow, the scientists are excavating skeletal remains, and carefully brushing them with melted paraffin to preserve them for shipment to research laboratories.

Having removed much of the overburden and remains of comparatively recent eras in the eight past annual expeditions, the party this summer uncovered a layer of ancient culture antedating the discovery of the island by Captain Commander.

Work being on St. Lawrence's Day, Aug. 21 (10th, old style) 1728.

The immigrants crossed over in seven successive waves, Dr. Geist being the last. He was accompanied by some earlier civilizations were of a higher culture than some of the latter ones, he has determined.

Tracing Migration Stories

Skeletons Help Archaeologist Working on Lonely Island in North

The life story of successive waves of civilization which crossed the island stepping stones across Alaska and America is being traced on lonely Lawrence Island in the Bering Sea.

The story—told in human skeletons, animal bones and broken utensils—was being traced in paragraphs. The work was described in a letter from the expedition headed by the noted Alaskan archaeologist, Dr. Otto Gerd.

Aided by 30 or 40 Eskimo laborers from Barrow, the scientists are excavating skeletal remains, and carefully brushing them with melted paraffin to preserve them for shipment to research laboratories.

Webster Air Trophy

Kingston Flying Wins At Competition

With a skillful display of airship, Pilot Gordon R. McGregor, president of the Kingston, Ont., Flying Club, captured the Webster memorial trophy and the title of Canada's foremost amateur air pilot at Cartierville airport at Montreal.

Competition for the Webster trophy, awarded by the family of John C. Webster, of Shelburne, N.B., killed in a crash here several years ago, was held under the auspices of the Canadian Flying Clubs Association with the co-operation of the Montreal Light Aerplane Club. McGregor eliminated 11 other airman, including two westerners, to gain the award.

Wes Hodgson, 18-year-old Regina newsboy, who was competing in a secondhand plane purchased from his savings as a newsboy, took first but failed to gain enough points and finished last in the competition.

"Well, I may have better luck next year," he said after hearing the results. Fred Lauby, of the Moose Jaw flying club, also competed.

Speed Of The Times

In 1820 it required 57 hours of human labor to grow an acre of wheat yielding twenty bushels. To-day, we are told by T. A. Russell, of Toronto, it requires approximately eight hours. This is only keeping up with the speed of the times. We are travelling to-day more than seven times as fast as our grandparents did a hundred years ago.

The first university chair in the world devoted to the study of spiritualism is to be established shortly at Lund University, Stockholm, Sweden.

In the South Sea Islands, frigate birds are trained to carry messages like homing pigeons.

Little Helps For This Week

God is not unrighteous to forget your work and labor of love which you have showed toward His name, in that you have ministered to the saints, and do minister. Hebrews 6:10.

Wherever in the world I am, in whatever estate, I have a fellowship with hearts that are kept and have a heart.

And a work of love to let for the Lord on whom I wait.

We do not at all whom I perceive that the common things, the writing of a note, the making of something intended as an offering of affection, our necessary intercourse with our own, may be made the performance of a most blessed and sacred duty.

Definite work is not always the best, which is not and squared for us, but that which comes as a claim upon the conscience.

Tackles Big Job

Mayor Of New York Aims To Make City Noiseless

New York City, with all its hustle, bustle and commotion, free of unnecessary noise, is the job tackled by Mayor F. H. LaGuardia. Shrieking autos, blaring radios, rumbling trucks and noisy garages—anything that makes a noise—arise to be curbed. Even police patrol cars and fire engines must not use their sirens unnecessarily. Heading the mayor's plan program is a month of "noiseless nights." He thinks everyone should be able to enjoy sleep uninterrupted. That campaign will operate through October. Then, during November, will come a month of hoped-for "noiseless days."

Rabbits Cause Floods

Reason For Their Collapse

Rabbits have been responsible for serious floods in the Swiss canton of Valais. Intense heat throughout Switzerland has melted an unprecedented amount of snow which has swollen the headwaters of the Rhone into flood tides.

This rare contingency is provided against by dykes built on the banks of the rivers. These, however, collapsed due to the fact that they had been burrowed nearly hollow by a vast colony of rabbits.

Grows Billions Of Flowers

The number of flowers used in Grasse, France, in the manufacture of perfumes staggers the imagination. In a single year ten billion (10,000,000,000) flowers, many millions of pounds of roses and some fifty million pounds of orange blossoms are harvested for the great perfumers.

In addition, the Grasse ends cut flowers by special trains to nearly every part of Europe.

World's Worst Volcano

Exudes Salts Of Ammonia Fumes That Suffocate Every Living Thing

Koh-i-Tafatan, known as the world's worst mountain, has again been in eruption. It is on the British-Persian boundary in Baluchistan, and for nearly 100 miles around no man, beast or reptile can survive. The fumes, however, in the air which emits lava from its crater and exudes dense volumes of salt of ammonia. It suffocates every living thing and burns up the vegetation. Its activity was heralded by flights of frightened birds escaping from the district, toward the Persian Gulf.

No troops can be maintained near Koh-i-Tafatan, although it is on the frontier. "Mount of Hellfire" the Persians call it.

How Club Was Named

An organization of veteran New York printers is oddly named The Judgment Day Club. On the night the New York World suspended publication, a composing room employee remarked, "This is Judgment Day—it's the end of the World." And that's how the fraternity of old New York World printers got its name.

"Wot I say is, the man should have all the say in the home; that's wot I say."

"I say the same—only I don't say it."

Perhaps the girl didn't wholly realize that this satisfaction which was like nothing she had ever experienced before, was the result of having achieved something—something really worthwhile. She had had help of course; but the idea had been her own, and Nancy had put it through triumphantly.

"I couldn't have done it without the others," she told herself, "but I wish, they wouldn't have done it to me; and Cousin Columbine was doubtful that the plan would work."

Thursday, August 29, 1935

About three years ago a little seed was sown in the mind of William Aberhart, it evidently was in fertile soil, for it began to grow and develop. The idea was broadcasted and seedlings were held throughout the province, gaining ground that it became a popular question. Turned down at the U.F.A. convention it still went forward, became a party and popular demand, then swept into power with an overwhelming majority, heading aside the U.F.A., who tried to stem the tide by calling in Major Douglas, but it was of no avail.

It is better that Social Credit goes in with such a majority, for should they not be able to perform all that they have set out to do, they cannot say that they were blocked by the opposition. However it remains for all of us to give our co-operation to the government to help put into effect the plans they have set out to do.

Reduction in Grain Storage Rates

In Alberta Pool Elevators

Announcement is made that a storage rate of 1.45 of a cent a bushel per day will apply on grain stored in all Alberta Pool elevators, effective from August 31st, 1935 for the ensuing license year. The present rate, which has prevailed for many years, is 1.30 of a cent a bushel a day.

The Alberta Pool elevators is making this voluntary reduction as a temporary measure in reducing cost to grain growers during the present recognized emergency in the marketing of grain.

The proposed reduction will affect 435 Pool elevators in this province as well as four terminals operated by the Alberta Pool on the Pacific coast.
